Rehabilitation Products Market: By Type (Walkers, Rollators and Sticks, Commode Wheel Chairs), By Application (Orthopaedists, Rehab Nurses), & By Region-Forecast (2016-2021)

Description: Rehabilitation is the process of improving, maintaining or restoring physical strength, cognition and mobility with maximized results to help people gain greater independence after illness, injury or surgery. Globally, development of efficient and advance technology, growing range of instruments and surgical procedures in the healthcare industry, increasing incidences of chronic disorders, rising geriatric patient population, rise in the awareness among people regarding rehabilitation products, and increasing government initiative across the globe are the prime growth drivers of global rehabilitation products market. In addition, increase in adoption of rehabilitation products in emerging economies such as China, India and others, will create new opportunities for global rehabilitation products market. However, higher cost of the research and development, and availability of rehabilitation products are the key restraints for global rehabilitation products market.

Geographically North America dominated global rehabilitation products market, because of high number of patient population, medical reimbursement facilities, and technological advancement. Asia Pacific is projected to have fastest growth, owing to rapidly increasing aging population, rise in consumer awareness, favourable government policies, modernization of healthcare infrastructure, and growing medical tourism industry in developing nations such as China, and India in this region. Among all the type, walkers, rollators and sticks has the highest market share in global rehabilitation products market due to higher prevalence of patients that have undergone surgeries of vital parts and handicapped or physically challenged people.

This report identifies the global rehabilitation products market size in for the year 2014-2016, and forecast of the same for year 2021. It also highlights the market drivers, restraints, growth indicators, challenges, and other key aspects with respect to global rehabilitation products market.
