Smoke Detector Market - Forecasts from 2016 to 2021

Description: Smoke Detector Market is projected to witness a compound annual growth rate of 10.32% to reach a total market size of US$1.936 billion by 2021, from US$1.074 billion in 2015. Major factors driving the market growth are an increase in expenditure of safety solutions by enterprises and government regulations mandating installation of smoke detectors especially in the residential and commercial buildings. Rising number of accidents leading to death and loss of property due to fire related accidents is also fueling the demand for these detectors.

Heavy investment in research and development by the manufacturers of these products has led to the development of new products like smart smoke detectors, which can be monitored from a remote location. High installation costs and high replacement costs incurred to replace traditional detectors with smart detectors are the major restraining factors.
