Data Center Infrastructure Market - Forecasts from 2016 to 2021

Description: Data Center Infrastructure Market is expected to witness CAGR of 6.10% over the forecast period to cross $170 billion by 2021, from the current estimate of $130 billion. This growth can be attributed to significant increase in investment towards data center infrastructure and solutions.

Data Center Infrastructure Market is being driven by factors such as increasing adoption of cloud computing and virtualization solutions, and IT infrastructure outsourcing; augmenting the deployment of advanced data centers. This in turn is boosting the demand for solutions such as servers, storage systems, networking infrastructure, software solutions among others. Americas region will continue to dominate the market over the forecast period but its contribution to overall Data Center infrastructure market will decline considerably by 2021 due to the high growth being observed in Asia-Pacific region.
