Biodegradable Superabsorbent Materials Market - Forecasts from 2016 to 2021

Description: Global Biodegradable Superabsorbent Materials Market is expected to witness moderate growth over the period 2015 to 2021. Growing demand for proper waste disposal owing to the increasing environmental concerns is one of the key drivers of global biodegradable superabsorbent materials market. Lack of dumping area coupled with stringent government and industrial regulations is forcing manufacturers to use eco-friendly products and techniques, thereby augmenting the demand for these materials across the globe.

Rising health concerns and growing awareness towards personal hygiene among women will further propel the growth of global biodegradable superabsorbent materials market in the forthcoming years. By application, disposable diapers dominate the market owing to improving living standard and rising hygiene concerns and health hazards among consumers. The other major factor contributing to the growth of this market is burgeoning global population which requires agricultural sector to increase yield and implementation of effective wastewater treatment which, in turn, is boosting the demand for biodegradable superabsorbent materials.

Geographically, Europe dominated the regional market owing to high consumer awareness regarding the use of eco-friendly products and biomass along with strict environmental regulations. APAC region is anticipated to witness the fastest regional market growth, led by China and India, due to high population growth rate, rising purchasing power, and urbanization.
