Executive Summary

Majority of biosimilars are in pipeline as most of the major biologics have either already expired or are about to lose their patent in the next two years which act as a major driving force for the biosimilar market. Four major biologics namely Humira, Enbrel, Remicade and Infliximab patents are set to expire in December 2016, incentivizes a large number of companies to enter into biosimilar market.

The biosimilar market is in its early stages, but is expected to grow in the next five years. The global biosimilar market is supported by various growth drivers such as growing pressure to curtail healthcare expenditure, patent expiries of major biopharmaceuticals, rising chronic disease among aging population and positive outcomes in ongoing clinical trials etc. Yet the market faces some challenges, such as restrict entry of new players, the complexity of manufacturing biosimilars and clinical limitations including patient recruitment obstacles.
