**Herbal Supplements Market by Source (Leaves, Barks, Fruits & Vegetables, and Roots), Application (Pharmaceuticals, Food & Beverage, and Personal Care), Function (Medicinal and Aroma), Form, and Region - Global Forecast to 2022**

**Description:**

“The herbal supplements market projected to grow at a CAGR of 6.8%”

The herbal supplements market is projected to reach USD 86.74 billion by 2022 at a CAGR of 6.8% from 2016 to 2022. The market is driven by factors such as increase in ageing population, growing female buyers for dietary supplements, use of herbal products by young demography, and increasing consumer awareness for preventive healthcare measures.

“Pharmaceuticals segment led the herbal supplements market by application, with the largest share in 2015”

Herbal supplements are heavily used in the pharmaceutical industry. European herbal medicine ingredients have a promising market in countries, such as U.S., Russia, and Japan. This is due to consumer preference regarding the quality of European herbal medicines, especially German and Swiss production. The Latin American and Asia-Pacific regions are promising markets for the application of herbal supplements in the pharmaceutical industry due to increased research & development activities, and consumer acceptance towards herbal remedies.

“Europe to lead the market in terms of market share between 2016 and 2022”

Europe is the largest market for herbal supplements. Growing awareness about dietary supplements in the region fuels the growth of the herbal supplements market. In this region, Germany leads the market owing to the high consumption of dietary supplements in the country, which provides considerable potential for the growth of herbal supplements as well. Other countries such as France and Italy are among the major markets for herbal supplements. Consumer preference for natural, chemical-free products is one of the major factors driving the growth of the European market.

The breakdown of the primaries on the basis of company, designation, and region, conducted during the research study, is mentioned as follows:
