The users, who are running short of primary storage such as in device storage in mobile and external hard disk; left with two options, which are data storage in cloud or storing data in NAS devices. However, NAS is highly economical and secure than cloud. A detailed analysis between cloud storage and NAS storage cost comparison have been mentioned in the report.

Consumer and Enterprise NAS Users Type Analysis

In terms of revenue; all the user segments-individual consumers, SOHO, SMBs, SMEs, and large enterprises-are going to witness an remarkable growth. Similarly, the CAGR of the user segments can vary from 16% to 48%. In 2012-2014, there was a sag in the growth rate of consumer NAS, due to the fall in the shipment as well as ASP. Consumer and Enterprise NAS Drivers, Restrains, and Trends

NAS for Smart home and home automation is a key driver in the market. In addition significant growth in data and piling up of unstructured data will enhance the demand for storage devices. However, cloud storage and SAN will pose a threat to the growth of NAS devices in the user segment. This is because, the cloud provides a cost-effective solution to individual consumer for short run than NAS.

One of the emerging trend in the market is integration of remote synchronization and remote access features by the vendors in their upcoming NAS models to minimize the threat of cloud storage as an alternate to NAS.
