Description: The global doxorubicin market was valued at USD 0.81 billion in 2015 and is expected to reach a value of USD 1.38 billion by 2024. The growing number of players in the market to control the shortage of the drug is one of the crucial factors that is expected to drive the market in the coming few years. Some of the doxorubicin manufacturers are Ortho Biotech Products, LP, Ben Venue Laboratories, Inc., and Bristol-Myers Squibb Company. The increasing indication of doxorubicin drug in various applications such as AIDS related Kaposi Sarcoma, multiple myeloma, neuroblastoma, osteosarcoma, and ovarian cancer signifies the growth in demand for the drug. The technological advancement in the drug formulations to overcome the adverse effects on health and also introduces various types of drug delivery systems such as nanoparticles or liposomal coated are some of the pivotal factors that are impelling the industry growth.

The U.S. government had issued an executive order to overcome the shortage of life saving drugs, chemotherapy agents, and critically needed drugs in the U.S. region, is one of the indicators accounted for the increasing number of players in this sector. Based on the estimates of Surveillance, Epidemiology, and End Results (SEER), the anticipated number of malignancy cases in 2016 are listed below:
