India Cheque Scanner Market (2017-2022): Market Forecast By Types (Single Feed and Multi Feed), Applications (Desktop and Kiosks), Regions (North, South, East and Western), Specifications and Competitive Landscape

Description:
To provide adequate banking needs to the customers, India currently has over 1.3 million brick and mortar branches. To reduce the lead time of transactions through cheques, RBI's has taken initiative to implement Cheque Truncation System. Over the years, the demand for cheque scanners have increased considerably due to adoption of these by various banks in the country. Further, with rise of automated cheque deposition kiosks and digital bank branches promoted under Government supported “Digital India”, India Cheque Scanner Market is poised to continue on the path of steady growth in the near future.

India Cheque Scanner Market is forecast to grow due to manifold increase in demand for single feed cheque scanners which can be incorporated into Cheque Deposition kiosks to scan the deposited cheque and produce receipts. Further, commercial bank branches are also set to rise in the near future with the focus now shifting towards Digital Bank Branches to increase the efficiency and reduce cost of operation.

In Multi Feed Check Scanner category, banks have emerged to be the highest user of these with majority of the scanners being used as Desktop Cheque Scanners to be operated by a bank teller. In Single Feed category, the majority of the scanners were installed in the cheque deposition kiosks.
