Global Integrated Building Management Systems Market 2017-2021

Description: About Integrated Building Management Systems

The global IBMS market is expected to record a high growth during the forecast period. Many buildings are expected to opt for integration of their BAS. Integrated systems aid facility managers and building personnel to effectively monitor and regulate operations using a single controller as opposed to individual and distinct controllers for automation solutions. Building automation and control systems are normally installed in residential, commercial, and public buildings to operate, control, and monitor mechanical, electrical, and plumbing (MEP) systems, lighting controls, and safety and security systems.

The analysts forecast the global integrated building management systems market to grow at a CAGR of 12.48% during the period 2017-2021.
