Production and Market of α-Pinene and β-Pinene in China

Description: This report is a value chain analysis of the pinene industry in China covering pinene, its raw materials and downstream products, presenting the overall development of the industry in 2010-2015 and the industrial outlook in the following five years and trying to provide a guide for investment.

Pinene is a preliminarily processed product of gum turpentine and can be divided into two types: alpha-pinene (α-pinene) and beta-pinene (β-pinene). During the past few years, the pinene industry has been underperforming in China with falling output and consumption. In particular, the consumption of β-pinene experienced changes from prosperity before 2011 to a downturn afterwards.

Answers to these questions can be found in this intelligent report:

- What had happened to the pinene industry during the five years?
- How about the performance of the producers?
- What are the changes in its downstream markets?
- What will be the future development of the pinene industry?

The key points of this report are listed as below:

- Historical production situation of α-pinene and β-pinene in China in 2010-2015 and forecast for 2016
- Prices of α-pinene and β-pinene in 2010-July 2016
- Consumption of α-pinene and β-pinene in China in 2010-2015 and breakdown by end-use segment
- Analysis of factors influencing the development of the pinene industry
- Forecast on supply and demand of pinene in China in 2016-2020

Contents:

Executive summary
Introduction and methodology

1 Supply
1.1 Production, 2010-2016E
1.2 Producers

2 Price trend, 2010-July 2016
2.1 Price, 2010-2016E
2.2 Price, 2015-July 2016

3 Import and export, 2010-2015

4 Consumption, 2010-2016E
4.1 α-pinene
4.1.1 Market size and market share
4.1.2 Brief introduction of major derivatives
4.1.3 Export volume and value, June 2015-May 2016
4.2 β-pinene
4.2.1 Market size and market share
4.2.2 Brief introduction to major derivatives
4.2.3 Export volume and value, June 2015-May 2016

5 Brief introduction to supply of raw materials

6 Forecast on industry development
6.1 Influencing factors
6.2 Outlook, 2016-2020
7 Conclusion
