Global Commercial Aircraft Landing Gear Market: Analysis & Forecast: 2016-2022, (Focus on Gear Type and Aircraft Type)

Description: The aircraft landing gear market is experiencing an advanced rate of growth over the past few years due to the increasing demand for aircrafts across the globe. This high scale of growth in the landing gear industry is subsequently influencing the market, wherein a new range of program is being carried out to develop a lightweight and cost-effective landing gear system. The impending need for lightweight landing gear, rising demand in emerging economies, increasing air passenger traffic and improvement in the global economic conditions are some of the major reasons driving the aircraft landing gear market forward. The different types of landing gear systems include: main landing gear and nose landing gear. By analysis, aircraft landing gear market generated $4.84 billion in 2016, in terms of revenue.

The following points provide a concrete description of the report content and the topics covered in the report:

- This report identifies the global aircraft landing gear market under different segments such as aircraft type, gear type, and geography
- The study includes the market analysis and forecast of the global aircraft landing gear market from 2016 to 2022 in terms of value. The report also highlights the year-on-year growth of the market
- It examines the prime supply and demand side factors affecting the growth of the market along with the current and future trends prevalent in the aircraft landing gear market
- It also presents a detailed examination of the aircraft landing gear market along the lines of market drivers, restraints, growth opportunities, and challenges
- The report also highlights the value chain of the industry with a major focus on technology roadmap
- A detailed competitive analysis has been included in this report which focuses on the key market developments & strategies followed by the key players in the market. This section comprises of a thorough Research and Development (R&D) analysis of the leading players
- Aircraft landing gear market analysis and forecast with respect to various gear types such as Nose Landing Gear (NLG) and Main Landing Gear (MLG) among others, garners major emphasis in the report
- Aircraft Landing gear market has been analyzed for all geographies including North America, Europe, Asia-Pacific, and the Rest of the World with further analysis in respect to other major countries
- Several ongoing programs for the advancement of the landing gear systems are included in this report
- The key market players are analyzed and profiled in detail in the report. This section covers the business financials, company snapshots, key products & services, major developments, future programs (if any), and finally, the individual SWOT analysis.

Executive Summary

1 Research Scope & Methodology
  1.1 Scope of the Report
  1.2 Commercial Aircraft Landing Gear Market Research Methodology

2 Market Dynamics
  2.1 Market Drivers
    2.1.1 Growing demand for the Lightweight Landing Gear
    2.1.2 Growing Demand for Aircraft
    2.1.3 Rising Demand of Landing Gear Systems from Emerging Economies
  2.2 Market Challenges
    2.2.1 Design and Development Challenges for the Landing Gear System
    2.2.2 Strict Regulatory Requirements
    2.2.3 Machining Challenges with New Materials
  2.3 Market Opportunities
    2.3.1 Increasing Use of New Materials for the Production of Landing Gear
    2.3.2 More Electric Aircraft (MEA)
