BorgWarner Inc., Honeywell International Inc., IHI Corporation, Cummins Inc., and Mitsubishi heavy Industries are the major turbocharger supplies in the global automotive turbocharger market. Of these, several are seeking mergers and acquisitions as strategic initiatives to drive growth.
On the basis of its comprehensive research, the author forecasts that the twin turbo technology segment is expected to show above average growth during the forecast period.

Within the global automotive turbocharger market, the wastegate segment is expected to remain the largest market. There is continuous implementation of fuel emission regulations in developing regions and increasing awareness about fuel efficiency among customers, which leads to increased use of this technology in commercial vehicles, which would spur growth for this segment over the forecast period.

North America is expected to remain the largest region due to stringent carbon emission regulations by NHTSA. These regulations force OEMs to look for innovations to achieve engine downsizing. Also, consumer awareness of fuel efficiency is leading to the use of turbochargers in gasoline vehicles and increasing investment by the industry players within the North America region.
