World LTE markets - 5G initiatives & MBB Spectrum: Markets & Forecasts up to 2020

Description: The bundle World LTE markets – 5G initiatives & MBB spectrum includes two deliverables dealing with both LTE and spectrum issues:

1. A database (updated half-yearly): quantitative & qualitative data for 46 countries, 6 zones & world consolidated - 76 LTE operator sheets are also available. It gathers information about spectrum issues, technologies, revenue & subscriber data & forecasts up to 2020. It presents the current status of the main mobile broadband frequency bands and results of auction processes including allocation modes, prices paid by each licensee, quantity of spectrum acquired by player, technology, price paid per MHz per PoP for 10 years and detailed information on the regulatory status.

2. A report (updated half-yearly) providing you with the state-of-the-art regarding LTE: overview of dynamics in LTE markets up to 2020 by geographical area and by technology. It also provides you with analyses of the worldwide LTE market status, LTE pricing, new services, technological issues, recent pieces of news on spectrum allocations, spectrum prices comparison, roaming, chipsets and devices.

With regards to spectrum, latest developments in the field are highlighted. Information include the main evolutions of the regulatory framework, spectrum sharing issues and new radio technologies, 5G developments, mobile spectrum in Western Europe, Eastern Europe, Asia Pacific, North and South America, and Africa Middle East, and spectrum valuation.
