
Description: "Increased sophistication in cyber attacking is driving the growth of the information security consulting market"

The author estimates the global information security consulting market to grow from USD 16.12 billion in 2016 to USD 26.15 billion by 2021, at a Compound Annual Growth Rate (CAGR) of 10.2%. The information security consulting market is growing rapidly because of the increase in adoption of cyber security solutions, due to the increase in security breaches targeting enterprises.

"Network security to have the largest market size in 2016"

Network security is estimated to have the largest market size in 2016, because of the growing need to secure complex networks. The growth in the network security is associated with the rise in security breaches targeting enterprise networks, where hackers try to gain access to sensitive data. Furthermore, application security will grow at the highest CAGR during the forecast period, due to the rise in Internet of Things (IoT) and Bring Your Own Device (BYOD) trend.

"The BFSI vertical to have the highest growth rate during the forecast period"

Information security solutions have been deployed across various industry verticals, including aerospace & defense, government & public utilities, Banking, Financial Services, & Insurance (BFSI), IT & telecommunications, healthcare, retail, and manufacturing. The BFSI vertical is expected to witness the highest CAGR during the forecast period because of the increasing adoption of web and mobile applications, which are prone to advanced cyber-attacks.

"Asia-Pacific is expected to have the highest growth rate during the forecast period"

Asia-Pacific (APAC) includes emerging economies, such as India and China, which are rapidly deploying information security services. This is mainly due to the digitization of businesses and adoption of cloud services by small, medium, and large enterprises in the region.

In-depth interviews were conducted with CEOs, marketing directors, other innovation and technology directors, and executives from various key organizations operating in the information security consulting marketplace.
