Signaling Devices Market (Audible & Visual) for Hazardous and Safe Areas, by Product (Strobe Beacons, Lighting and Fire Alarms/Call Points), Connectivity Service (Wired & Wireless), Industry, & Geography - Global Forecast to 2022

Description:

The global signaling devices market (audible & visual) was valued at USD 1.49 billion in 2015 and is expected to reach USD 2.03 billion by 2022, growing at a CAGR of 4.43% between 2016 and 2022. Strobe beacons have been a major market for signaling devices. With the increased demand for these products in various industrial applications, more advancements are taking place and the end users are focusing more on integrating signaling devices as an effective emergency management systems in their industry premises. Strobe beacons are greatly influenced by the signaling devices market (audible & visual) which are most widely used products by almost every industry in the modern era and are posing opportunities for the industry players to invest in these signaling device products.

The signaling devices market (audible & visual) for the oil and gas industry held the largest market size in 2015 and is expected to grow at the highest CAGR between 2016 and 2022. Fueled by the growing application of these signaling devices such as strobe beacons, lighting products, speakers, video surveillance systems, and so on in the exploration and extraction of shale gas and oil; this industry segment is likely to retain its leading position till 2022.

The RoW region consists of the Middle East, Africa, and Latin America is expected to hold the largest share and growth rate of the signaling devices market (audible & visual) during the forecast period. The Middle East and Africa are the major countries driving the growth of the signaling devices market (audible & visual) in RoW. A significant number of prominent oil and gas and mining industries which are highly prone to explosive environments are based out of North America and APAC. This is one of the major factors driving the growth of the signaling devices market (audible & visual) in RoW. On the other hand, North America followed the RoW market in 2015, owing to major signaling device manufacturing companies based out here, this region is expected to grow further in the coming years of the signaling devices market (audible & visual).
