Reed Switch Market: By Application (Temperature Sensing, Relay Application, Pulse Counting, Position Sensing); By End-Use Industry (Electronics & Communications, Consumer Durables, Automotive, Construction & Security) & By Region-Forecast (2016-2022)

Description: The reed switch is an applied magnetic field operated electrical switch used in a wide range of applications. It contains a pair (or more) of magnetizable, flexible, metal reeds whose end portions are separated by a small gap when the switch is open, and when closed these reeds will come together due to magnetic field completing the circuit. Globally, increasing demand from end-use industries as a result of growing demand for end products is expected to result in an increased demand for reed switch and hence it is expected to be the key demand driving factor during the period of study.

Geographically, Asia-Pacific dominated the reed switch market driven by higher demand and consumption of reed switch in a wide range of applications in major end-use industries in the region. Asia-Pacific was followed by North America and Europe as second and third largest market for the reed switch market. Asia Pacific is projected to have the fastest growth, owing to rapidly expanding industrial base and growing number of end-use industry players in developing nations such as China and India in this region.

This report identifies the reed switch market size for the years 2014-2016, and forecast of the same till the year 2022. It also highlights the market drivers, restraints, growth indicators, challenges, and other key aspects with respect to the reed switch market.
