Wearable Cardioverter Defibrillator Market: By Medical Condition (Peripartum Cardiomyopathy, Congenital Heart Disease, Inherited Arrhythmias); By End User (Hospitals, Home Care, Cardiology Clinics) & By Region-Forecast (2016-2022)

Description: Wearable cardioverter defibrillator (WCD) is a medical device worn by cardiac patients who are at risk for sudden cardiac arrest (SCA). A wearable cardioverter defibrillator allows their physician time to assess their long-term arrhythmic risk and make appropriate plans for preventing sudden cardiac arrest resulting in a fatality. Globally, an increasing number of people with cardiac diseases and technological advancement in cardiology are expected to remain the key growth drivers for the wearable cardioverter defibrillator during the period of study.

Geographically, North America dominated the wearable cardioverter defibrillator market driven by world class healthcare infrastructure with a technologically advanced practice, higher spending and presence of key industry players in the region. North America was followed by Europe and Asia-Pacific as second and third largest market for the wearable cardioverter defibrillator market. Asia Pacific is projected to have the fastest growth, owing to a rapidly developing medical infrastructure, increasing spending on healthcare and growing medical tourism in developing nations such as China and India in this region.
