Electric Wheel Chair Market: By Type (Centre Wheel Drive Electric Wheelchair, Front Wheel Drive Electric Wheelchair, Standing Electric Wheelchair, Rear Wheel Drive Electric Wheelchair) & By Region-Forecast (2016-2022)

Description: Electric wheelchairs, also often called as power chairs or electric power wheelchairs, and battery operated wheelchairs are for differently abled and senior citizens. Electric wheelchairs do not require any human assistance for mobility as they are powered by battery. The most obvious advantage of an electric wheelchair is that it is user friendly and convenient and very useful for those unable to use a manual wheelchair or those who may want to use a wheelchair for travelling longer distances, and in such a case, using a manual wheelchair is very difficult. Globally, a growing elderly population is one of the key growth drivers for the electric wheelchairs during the period of study.

Geographically, North America dominated the electric wheelchair market driven by the government’s initiative to provide medical insurance to people over age of 65 and helping them to get medical facilities at subsidized rates, high purchasing power, increasing elderly population and consumer awareness and inclination towards more sophisticated technology has driven the progress of electric wheelchair market in this region. North America was followed by Europe and Asia-Pacific as second and third largest market for the electric wheelchair market. Asia Pacific is projected to have the fastest growth due to a gradual increase in consumer awareness and development of medical facilities, increased spending on healthcare and growing medical tourism in developing nations such as China and India in this region.
