Polyfilm Market by Resin Type (LLDPE, LDPE, HDPE, BoPP, CPP, PVC, BoPET, BoPA), End-use Industry (Agriculture, Packaging, Building & Construction, Consumer Goods, Medical) and Region - Global Forecast to 2026

Description:
The global polyfilm market is estimated to reach USD 167.57 billion by 2026, at a CAGR of 4.0% from 2016 to 2026. Factors such as increasing demand for BoPET films, technological developments in agriculture, and rising use of bio-based polymers are expected to fuel the growth of the market in the coming years. However, mature markets in various European countries and strict environmental & governmental regulations may restrain the growth of the market in near future.

Packaging is projected to be the fastest-growing end-use industry segment during the forecast period. The demand for packaged goods has increased with the increasing middle class in emerging countries. Polyfilms are environment-friendly films with long shelf life, which has led to their increased demand in the packaging industry. Polyfilms are widely used across food & beverage, tobacco, beauty & personal care, tissue & hygiene industries.

LLDPE has low manufacturing cost as compared to other resin types. LLDPE is widely used in flexible packaging, as it is economical and easy to process. LLDPE is also combined with other resin types to reduce the overall cost.
