India Oleochemicals Market By Type (Fatty Acid, Fatty Alcohols, Glycerin, Fatty Acid Methyl Esters, Fatty Amines, etc.), By End Use Industry (Soap, Pharmaceuticals & Personal Care, Detergents, etc.), Competition Forecast and Opportunities, 2011-2025

Description: Oleochemicals are industrially produced chemicals derived from animal fats or vegetable oils. Since oleochemicals are less toxic as compared to conventional petrochemical products, various end use industries such as those engaged in manufacturing of personal care products, detergents, soaps and agrochemicals, are substituting their requirement for petrochemicals with oleochemicals.

India oleochemicals market has been segmented into five categories namely - fatty acids, fatty alcohols, glycerin, fatty acid methyl esters and fatty amines. Robust growth in India oleochemicals market can be attributed to the increasing demand for naturally derived raw materials for personal care and soaps industry. Rising consumer spending on green products and increasing awareness regarding the harmful effects of chemicals used in cosmetic products has resulted in an upsurge in preference for oleochemicals in the country, especially over the last few years.

According to "India Oleochemicals Market By Type, By End Use Industry, Competition Forecast and Opportunities, 2011-2025", India oleochemicals market is projected to cross US$2.6 billion by 2025. Fatty acids control a lion's share in the India oleochemicals market on account of large requirement for distilled fatty acids and polyunsaturated acids, which are essential in the production of soaps, personal care products, detergents, lubricants, surfactants, etc.

However, the fastest growth in India oleochemicals market over the next ten years is anticipated to be exhibited by methyl esters and fatty amines, which are increasingly being used in the agrochemicals sector. West region controls the largest share in India oleochemicals market on account of strong presence of soaps and detergent manufacturing industries in the region. However, North India is projected to exhibit the fastest growth in demand for oleochemicals in India over the course of next ten years.

Few of key players involved in India oleochemicals market include VVF(India) Limited, Godrej Industries Limited, 3F Industries Limited, Jocil Limited, Indo Amines Ltd., Universal Biofuels Limited, Oil Base India and Oleochem India Private Limited.
