Global Thermoplastic Elastomers Market 2017-2021

About Thermoplastic Elastomers
Thermoplastic elastomers (TPEs) possess both elastomeric and thermoplastic characteristics. They are produced from thermoplastics and elastomers and can be segregated based on their constituent materials. TPE can be remolded, reshaped, and recycled. Therefore, they are extensively used to replace conventional materials, such as polyvinylchloride (PVC), natural rubber, nitrile rubber (NBR), and ethylene propylene diene monomer (EPDM) in major industries, including automotive, construction and infrastructure, consumer electronics and appliances, healthcare, packaging, and footwear industries globally.

The analysts forecast the global thermoplastic elastomers market to grow at a CAGR of 7.78% during the period 2017-2021.
