Microsoft Excel Series - Part 3: Beyond IF and Excel Macros

Description:
This Excel macros training program presented by Excel expert David Ringstrom, CPA, will help attendees apply their extended knowledge of Excel macros. David will define how to create loops within your spreadsheets and explain when to use the SELECT CASE function versus IF statements. Attendees also will learn how to use Breakpoints to simplify debugging errors in the programming code.

Objectives of the Presentation:
- Learn how to add enhanced decision-making capabilities to Excel macros
- Discover how to create loops in your programming code
- Learn about the IF and SELECT CASE functions
- Apply your extended knowledge of Excel macros
- Identify how to use Breakpoints to simplify debugging errors in your programming code
- Compare For, Do Until, and Do While for creating loops within Excel macros

Why Should you Attend?
Part 3 of this four-part macros series will explore how to add enhanced decision-making capabilities to Excel macros. Attendees will discover how to create loops in the programming code as well as learn about the IF and SELECT CASE functions. The webinar also will illustrate how to format data and carry out actions within your spreadsheets based on criteria you specify.

Excel expert David Ringstrom, CPE, will demonstrate techniques from Excel 2016, but his detailed handouts identify differences in Excel 2007, 2010, 2013 and 2016 when needed. His webcasts are fast-paced and attendees often are surprised at the amount of ground he covers in a session. He welcomes participants' questions, so come ready to pick his brain. David's detailed handouts with numbered steps, serve as reference material you can utilize going forward. He also provides an Excel workbook that includes most of the examples he uses during the webcast.

Areas Covered:
- Comparing For, Do Until, and Do While for creating loops within Excel macros
- Creating a macro that enables you to unhide all hidden worksheets within a workbook at once, instead of one at a time, through Excel's user interface
- Contrasting decision-making capabilities with IF statements and the SELECT CASE function
- Formatting data and carrying out actions within your spreadsheets based on criteria you specify
- Understanding the risks of creating loops that can put Excel into an unusable state
- Utilizing Breakpoints to simplify debugging errors in your programming code

This webinar is a part of 'Microsoft Excel Macros-4-Part Series: Your Key to Success In The Modern Business World' Webinar Series.

Ordering:
Order Online - [http://www.researchandmarkets.com/reports/4047601/](http://www.researchandmarkets.com/reports/4047601/)
Order by Fax - using the form below
Order by Post - print the order form below and send to
Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct and select the format(s) you require.
