India Automotive Filter Market Forecast & Opportunities, 2021

Description:
Growing demand for automotive filters in India can be attributed to rapidly expanding automotive industry, continuously expanding vehicle fleet size, increasing passenger car and two-wheeler sales and rising purchasing power of consumers. According to the OICA, motorization rate in India increased from 20 per 1,000 inhabitants in 2013 to 22 per 1,000 inhabitants in 2014.

Expanding fleet size of passenger cars, two-wheelers and three-wheelers in the country is forecast to fuel the demand for automotive filters in the coming years. Moreover, continuous government support in the form of various initiatives such as National Automotive Testing and R&D Infrastructure Project (NATRiP), Focus Market Scheme (FMS), Automotive Mission Plan 2006-2016, National Electric Mobility Mission Plan (NEMMP) 2020, Make in India Program, etc., are anticipated to aid the country's automotive filter market in the coming years.

According to “India Automotive Filter Market Forecast & Opportunities, 2021”, the automotive filter market in India is anticipated to grow at a CAGR of over 11% during 2016 - 2021, on account of increasing automobile production and sales, and shorter replacement period of automotive filters.

Two-wheeler segment occupied the largest share in India automotive filter market in 2015, and the segment is anticipated to maintain its dominance during the forecast period as well. Region-wise, north region is the largest demand generating country for automotive filter in the country.
