Description:

"Increasing instances of enterprise endpoint-targeted attacks is expected to drive the EDR market"

The Endpoint Detection and Response (EDR) market size is estimated to grow from USD 749.0 million in 2016 to USD 2,285.4 million by 2021, at an estimated Compound Annual Growth Rate (CAGR) of 25.0%. The EDR market is driven by factors, such as need to mitigate IT security risks and threats such as malwares, ransomwares, and advanced persistent threats, along with a rising enterprise mobility trend across organizations. However, the high cost of innovation and budget constraints of organizations limit the growth of the market.

"The managed services segment is expected to grow at the highest CAGR during the forecast period"

Organizations are rapidly growing their partnership networks to deploy such EDR solutions across the globe. Thus, the managed services segment is expected to grow at the highest CAGR during the forecast period. However, the professional services segment is expected to have the largest market size in 2016.

"The mobile devices enforcement point segment is expected to grow at the highest CAGR during the forecast period"

The mobile devices EDR enforcement point segment is estimated to grow at the highest CAGR during the forecast period due to the rise in Bring Your Own Device (BYOD) trend and increased usage of mobile devices in the Banking, Financial Services, and Insurance (BFSI) sector. The workstations enforcement point segment is expected to have the largest market size in 2016, owing to an increased instance of advanced threats, such as malwares, ransowmares, and advanced persistent threats on the workstations.

"Asia-Pacific is expected to have the highest growth rate during the forecast period"

Asia-Pacific (APAC) includes emerging economies, such as China, Japan, and India, along with countries from the South East Asia, which are rapidly transforming into business hubs with the regional expansion of global enterprises and the emergence of a large number of small and medium-sized enterprises. APAC is expected to grow at the highest CAGR during the forecast period. This is primarily due to the increasing awareness and adoption of such solutions and services among enterprises, operating across various verticals in the region. Furthermore, North America is expected to have the largest market size in 2016.

In-depth interviews were conducted with the CEOs, marketing directors, other innovation & technology directors, and executives from various key organizations operating in the EDR market place.
