Macroeconomic Opportunities and PESTLE Analysis of Netherlands 2017

Description: The Netherlands economy is dominated by the service sector, which contributed approximately 80.7% to the total GDP in 2016. Government & care is the major contributing 19.9% of GDP. The Netherlands government is expected to start a number of projects that will help further develop on various sectors such as infrastructure, health, and education. The Netherlands has Sustainable Development Goals which provides direction for prioritizing capital expenditure, encouraging private investment and creating jobs for nationals in the private sector. The Netherlands government is focusing on tax reforms, which will encourage the consumer spending and move the economy toward an externally sustainable path.

A leading global management consulting and market research firm, has analyzed the political, economic, social, technological, legal, and environmental factors of the Netherlands and has come up with a comprehensive research report, “PESTLE Analysis of the Netherlands 2017”. This report provides an analysis of the Netherlands economy from historical, current, and future perspectives. SWOT analysis, scenario analysis, and risk analysis of the Netherlands is also included in the report. The report also includes forecast for the Netherlands economic growth through 2022.

The report highlights various drivers and challenges which have influence on investment decisions in the economy. The Netherlands is a politically stable country, which follows a constitutional monarchy and a decentralized unitary state. The Netherlands is highly dependent on mineral oils and products export, which is one of the main challenges. If oil prices increase and decreases, it directly affects the country's GDP. The Netherlands government has investment upcoming year to spur development in the private sector and carry out a number of large infrastructure projects, including the building of roads, trade and industrial centers, and hospitals. The Netherlands has to depend on other countries for food because the Netherlands has very low agriculture productivity.

This unique report will provide you with valuable information, insights, and tools needed to identify new growth opportunities and operate your business successfully in this market. This report will save hundreds of hours of your own personal research time and will significantly benefit you in expanding your business in this market. In today's stringent economy, you need every advantage that you can find.

To make business, investment, and strategic decisions, you need timely, useful information. This market report fulfills this core need and is an indispensable reference guide for multinational materials suppliers, product manufacturers, investors, executives, distributors, and many more that operate in this market.

Some of the features of “PESTLE Analysis of Netherlands 2017“ include:

- Trend and forecast for key macroeconomic variables that are useful to make major investment decision
- Analysis on economic activity, investment environment, and trade structure of the country
