PET Bottle Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2017 - 2022

Description:
PET bottles are bottles made-up of a plastic resin chemically known as polyethylene terephthalate. Due to some inherent properties of PET resin, these bottles are transparent, light-weight, high in strength and impermeable to carbon dioxide. Unlike other plastic containers that use PP or HDPE or PVC, PET bottles are translucent, leave no residues and can be easily recycled. Primarily used in the packaging of water and beverages, PET bottles are also gaining prominence in other industries like - juices, salad dressings, household cleaners, medicines, dish detergents, mouthwashes, etc. Being light in weight and easy to handle, they are preferred in the packaging of carbonated soft drinks (CSD's) and are continuously replacing glass bottles which tend to break and are not user friendly. With an increasing demand for bottled beverages and replacements of glass and metal containers, the demand for PET bottles is currently rising at a healthy pace. The global PET bottle market was worth 16.8 Million Tons in 2016, growing at a CAGR of around 2.4% during 2009-2016.

“PET Bottle Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2017-2022” provides a detailed insight into the global PET bottle market.
