
Description:

Kaspa peas are a type of legumes belonging to the same sub-species as green peas. They are a great source of protein, fibre and potassium. Moreover, the folate and iron found in kaspa peas help in preventing anaemia and maintaining over-all health. They are a popular snack in the South Indian region as a result of their nutritional value and pleasing taste. Kaspa peas, along with other legumes provide a cheap source of nourishment in the developing countries, especially in the South Asian region. The global kaspa peas market reached a volume of around 12 Million Tons in 2016, growing at a CAGR of around 2% during 2009-2016. The global kaspa peas market is showing a continuous growth driven by their ease of harvest, pod shatter resistance, high yield potential, expanding food industry and increasing population in the developing regions.
