Capnography Market - Forecasts from 2016 to 2021

Description: Capnography is the process by which concentration of carbon dioxide or its pressure can be gauged in the breath of patients. It is a prerequisite equipment for monitoring and finds its application in areas such as critical care, recovery, recovery, wards, and ambulances. It is a non-invasive technique through which respiratory problems such as ventilator failure, malposition of tracheal tubes and defective breathing circuits among others can be easily identified rapidly.

Capnography displays exhaled carbon dioxide as a waveform to show the quantity of carbon dioxide present at each stage of the respiratory cycle. Growing advancement in technology is one of the key factors driving the Capnography market. These advancements have facilitated easier and earlier detection of diseases. However, few factors such as the presence of alternative technology like pulse oximeter in the market which is also used for respiratory monitoring can limit the scope of market growth and also the use of this equipment to measure respiratory rates can prove to be unreliable for non-intubated individuals.

Capnography market is projected to grow from US$357.114 million in 2016 to US$867.782 million by 2021, growing at a CAGR of 19.43% over the forecast period. Geographically, Americas is the biggest regional market for these equipment due to the growing occurrences of respiratory disorders in the region.

Research Methodology

Firstly, the report provides a brief introduction of the market and deals with detailed research methodology for calculating market size and forecasts, secondary data sources used and the primary inputs which were taken for data validation. This section also outlines various segmentation which has been covered as part of the report.

Market Dynamics

Next, the section provides comprehensive market dynamics through an overview section along with growth drivers, challenges, and opportunities which exist in the current market. This section of the report also provides supplier and industry outlook as a whole; key industry, global and regional regulations which are determining the market growth and a brief technological aspect of Capnography. Complete industry analysis has also been covered by Porter's five forces model as a part of this report section.

Segmentation

Thirdly, Capnography has been segmented on the basis of technology types, products, end user applications and geography as follows:

By Technology:
Disposables
Capnographs

By Products:
Sidestream Capnographs
Microstream Capnographs
Mainstream Capnographs

By End-User applications:
Ambulatory
Surgical Centres
Hospitals
Others

By Geography:
Americas
North America
South America
Market Players

Finally, competitive intelligence section deals with major players in the market, their market shares, growth strategies, products, financials, and recent investments among others. Key industry players profiled as part of this section are GE, Medtronic, Dragerwerk, and Masimo among others.
