**A-share Listed Chemical Preparation Companies in China - Profiles and Financial Data**

**Description:** Chemical preparations are pharmaceuticals whose active ingredient is chemically synthesized, in contrast to TCM preparation and biologic preparation. Chemical preparation mainly refers to pharmaceutical preparations, while biologic preparation is mainly vaccines and preparations extracted from animals and plants. The chemical preparation industry is a crucial sub-industry in pharmaceutical manufacturing. It remains at over 25% of the pharmaceutical industry in production value.

The total production value of chemical preparation in China shows a steady growing trend as it increased from CNY 150.1 billion in 2006 to CNY 753.5 billion in 2016, with the CAGR of 17.5%. According to the report, the market demand for chemical preparation in China is strong. Despite the decreasing growth rate in recent years, it still grew by over 10% in 2016.

This analysis shows that compared to developed countries, China's pharmaceutical industry overall faces some problems at present, such as a low concentration rate, small production scale, insufficient R&D investment, lack of core competitiveness and low-level repeated construction in some pharmaceutical enterprises. In general, the marketization of China's pharmaceutical industry is at a high level with intense competition. After decades of development, China has formed a group of enterprises with considerable scientific research abilities and advanced management and production experience. With the changing regulatory and market environment, enterprises with strong R&D capabilities and technical strength will gradually reach their full potential. In comparison, enterprises with weak R&D capabilities and poor technical level are likely to be weeded out in the new market environment. Consequently, the market will be focused on advantageous enterprises.

In this report, the author analyzes 45 chemical preparation enterprises listed in A-share market in China.

The report is composed of two parts: the first part is enterprise profiles and the second part is the operation status of these enterprises in the recent decade (presently 2006 to 2016, we will update it to the latest as time goes by).

The operation status is demonstrated from the following perspectives: (1) financial indexes, such as earnings per share, book value per share (BPS), sales per share, net cash flow per share, return on net worth and debt to asset ratio; (2) indexes on the income statement, such as revenue, operating profit, net profit and EBIT; (3) indexes on the income statement, such as revenue, operating profit, net profit and EBIT; (4) indexes on the balance sheet, such as liquid asset, fixed asset, current liability, non-current liability, capital reserve and shareholders' equity.
