Automotive Wiring Harness Market by Application, Vehicle Type, EV Type, Component Type, Material Type, and Region - Global Forecast to 2021

Description:
“Consumer preference for high-end electronics in automotive gaining pace over the years”

The global automotive wiring harness market was estimated to be at USD 42.70 billion in 2016 and projected to reach USD 61.30 billion by 2021, at a CAGR of 7.5%.

Increasing complexity in vehicles along with rising intrusion of electronics is driving the demand for automotive wiring harness. As a result, the automotive wiring harness market has shown immense growth in developing countries such as India, China, and Middle East.

“Chassis harness application estimated to have the largest share in the automotive wiring harness market in 2016”

Chassis harness is the largest segment in wiring harness market owing to the complex installations in the instrument panel of passenger cars. The increased installation rate of high-end electronics in passenger cars increases the complexity in the cables of the system. This factor drives the demand of chassis harness, which is responsible for the largest share in the automotive wiring harness market.

“Light vehicle segment dominated the wiring harness market in terms of sales in 2016”

Light vehicle segment was estimated to grow at the highest CAGR and is projected to account for the highest market share in terms of sales. Increased production of passenger cars will drive the wiring harness market for light vehicles.

“Asia Pacific is estimated to be the fastest growing region in automotive wiring harness market”

Asia-Pacific region is estimated to grow at the highest CAGR, by value, over the projected period from 2016 to 2021. High volume markets and increase in demand for high-end electronic and safety features in passenger cars makes Asia-Pacific the largest regional market for automotive wiring harness. Also, upcoming legislation for safety technologies in developing countries is a major factor that will drive this market.
