Riflescope Market by Sight Type (Telescopic Sight, Reflex Sight), Technology (Electro Optic, Thermal Imaging/Infrared, Laser), Application (Hunting, Armed Forces, Shooting Sports), and Region - Global Forecast to 2022

Description:

“Increasing popularity of hunting games, shooting sports, and need for precision shooting are expected to drive the riflescope market during the forecast period”

Increase in the popularity of hunting activities and shooting games is expected to drive the riflescope market. The riflescope market is expected to witness technological advancements for application in the military. The advent of night vision scopes has led to an increase in the use of riflescope in military, by law enforcement agencies and Special Forces. However, high cost of riflescope and ban on hunting in some countries of the Asia-Pacific region are the major restraints in the growth for the riflescope market.

“Based on application, the hunting segment is expected to lead the riflescope market during the forecast period”

On the basis of application, the hunting segment accounted for the largest share of the riflescope market in 2016. Hunting is popular in North America and Europe. Governments in these regions issue hunting licenses for different seasons. The growth of the population of certain animal species have driven governments to encourage animal hunting to control their population. However, countries in the Asia-Pacific region such as India and China prohibit animal hunting.

“Europe is expected to lead the riflescope market during the forecast period”

Europe is projected to lead the riflescope market during the forecast period. Europe accounted for the largest share of the riflescope market in 2016. The increasingly popularity of hunting and rise in the number shooting events are the key drivers for growth of the riflescope market. Soldier modernization programs have resulted in increased demand for riflescope in countries such as the U.K., the Netherlands, Germany, and France, as rifles are now equipped with advanced riflescope.
