Performance Analytics Market by Component, Application, Vertical, Analytics Type, Deployment, Organization Size, Industry - Global Forecast to 2021

Description: “Inclination towards metrics-driven performance analytics tools has been driving the market growth”

The global performance analytics market size is estimated to grow from USD 1.10 billion in 2016 to USD 2.59 billion by 2021, at a Compound Annual Growth Rate (CAGR) of 18.7%. Growing need to monitor and measure performance of business functions for optimal resource allocation and elimination of performance bottlenecks have been driving the market growth. Organizations are shifting their focus towards such metrics-driven analytics tools to control operational risks with proactive and strategic decision-making. However, lack of awareness regarding benefits of performance analytics solutions and concerns about positive ROI are the restraining factors for the performance analytics market.

“Predictive analytics would continue to hold the largest market share during the forecast period”

The predictive performance analytics market is estimated to hold the largest market share during the forecast period. Predictive analytics helps to predict future business scenarios with comprehensive analysis of historical as well as present performance data. Predictive model and analysis enable the users to understand probable risks that need to be considered and empower them to enhance enterprise performance at all levels.

“APAC is projected to grow at the highest rate during the forecast period”

North America holds the largest market share in 2016 and the trend is expected to continue in the coming years. The performance analytics market is showing strong positive trends in the region as several companies and industries are adopting performance analytics at various levels as a part of their strategy, in order to strive in the market and to increase their productivity. The APAC region is witnessing increased adoption of performance analytics solutions with growing awareness, massive data surge, and need to provide real-time performance analysis.

In the process of determining and verifying the market size for several segments and subsegments gathered through secondary research, extensive primary interviews were conducted with key people.
