Aluminum-extruded Products Market by Product Type, End-use Industry, Alloy Type, and Region - Global Forecast to 2021

Description:

'Aluminum-extruded Products Market by Product Type (Mill-finished, Powder-coated, and Anodized), End-use Industry (Construction, Automotive, Electrical & Electronics, Mass Transport, and Machinery & Equipment), Alloy Type, and Region - Global Forecast to 2021'

"Growing demand in the automotive industry to drive the market for aluminum-extruded products"

The global market for aluminum-extruded is projected to grow from USD 34.48 billion in 2016 to reach USD 47.61 billion by 2021, at an estimated CAGR of 6.67%. The market for aluminum-extruded products is driven by the growing demand in industries such as construction, automotive, aerospace & defense, and mass transport in both, developed and developing countries. Aluminum-extruded products are highly preferred to manufacture light-weight but durable products for a variety of industries. However, the high initial capital investment in required to install full setup of the aluminum-extruded products, and it poses as a restraint to the growth of the market.

"Mill-finished products segment is projected to grow at a steady CAGR during the forecast period"

The mill-finished products segment is projected to be the fastest-growing aluminum-extruded products type in the aluminum-extruded products market in the next five years. The mill-finished products are highly preferred in the construction, automotive, and machinery & equipment manufacturing industrial sites. The mill-finished products are cost-effective and perform well under extreme conditions.

"Asia-Pacific to be the fastest-growing market during the forecast period"

The Asia-Pacific region is projected to be the fastest-growing market during the forecast period, followed by Europe, from 2016 to 2021. China accounted for the largest share in the region; however, the Indian market is projected to grow at the highest CAGR during the forecast period. The key reasons attributed to the growth in the Asia-Pacific region are emerging economies, government initiatives for FDI, growth in awareness regarding aluminum-extruded products, and, most importantly, the growth in end-use industries such as construction and automotive. In North America, the U.S. was the largest consumer of aluminum-extruded products in 2015.
