ZF TRW Automotive Holdings Corporation, Delphi Automotive PLC, Continental AG, Robert Bosch GmbH, and Denso Corporation are the major ACC system suppliers in the global automotive ACC system market.

On the basis of our comprehensive research, the author forecasts that the sensor fusion and radar segments are expected to show above average growth during the forecast period.

Within the global automotive ACC system market, the radar segment is expected to remain the largest market, as it is used in all types of weather and situations while LIDAR-based ACC systems do not detect and track vehicles in adverse weather conditions nor do they reliably track extremely dirty (non-reflective) vehicles, which would spur growth for this segment over the forecast period.
Asia Pacific is expected to remain the largest market due to high vehicle production, improving economic conditions, and increasing investment by the industry players within the APAC region.
