Intelligent Pigging & Routine Mechanical Cleaning of Offshore & Onshore Pipelines

Description:
Program objectives
This intensive three-day foundation level course covers Pigging of pipelines whether it is for cleaning purposes or for defect identification/assessment is vital to ensure that the integrity and reliability of pipelines is effectively managed throughout the entire life cycle from design through decommissioning. This course will provide participants with the fundamental and principles of pipeline pigging, conditioning, and processing from the production to process facilities, or from the process facilities to the final distribution and then to the consumption end user. The participants will learn what the scrubbers are, why the pigging is needed, and how the traditional pigging operations are performed. Participants will learn how to design and operate the typical pigging equipment and processes through daily exercises.

Course Objectives
- ENABLE interpretation and assessment of data generated out of Intelligent pigging runs
- EXPLAIN mandatory regulatory requirements for Intelligent and Routine pigging operations including Pre & Post pigging Operations.
- COMPREHEND the different Intelligent Pigging technologies to enable selection of most suitable techniques for your specific application.
- EXPLAIN Pipelines Integrity Management codes requirements and how routine pigging can help maintaining the integrity of the pipeline across its design cycle and beyond.
- HIGHLIGHT how intelligent pigging data can be correlated with other operation, monitoring and inspection date to explain the pipeline behavior and failure code.
- RECOGNIZE the different types of mechanical cleaning pigs and how the pig design can influence its effectiveness and ensure smooth operation.
- CLARIFIES organizational interfaces and roles and responsibilities of the relevant technical personnel engaged in the pigging operations including contracts development and execution.
- EXPLAIN different standards and formulas related to assessment of pipe defects including Fitness for Service.
- PROVIDES insight into different repair option to defected lines and explain requirements to EPRS protocols

Ordering:
Order Online - http://www.researchandmarkets.com/reports/4199118/

Order by Fax - using the form below

Order by Post - print the order form below and send to
Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

Product Name: Intelligent Pigging & Routine Mechanical Cleaning of Offshore & Onshore Pipelines
Web Address: http://www.researchandmarkets.com/reports/4199118/
Office Code: SC

Product Format
Please select the product format and quantity you require:

| Quantity    | 3 Days - Single User: | USD 3075 |

* The price quoted above is only valid for 30 days. Please submit your order within that time frame to avail of this price as all prices are subject to change.

Contact Information
Please enter all the information below in BLOCK CAPITALS
