Solid State Battery Market - Forecasts from 2016 to 2021

Description:
Solid state battery market is expected to exponentially over the period 2016 to 2021. The main difference between the conventional Li-ion battery and a solid state battery is the electrolyte used. The former uses a liquid or gel while the later uses a solid electrolyte and offers benefits like higher energy density, longer cycle life and robustness. Unlike liquid electrolyte, solid electrolyte are non-flammable which in turns eliminate the need for multi-layer packaging, making the battery thin and light weight.

Growth of consumer electronics market and high investment in the automobile industry for the development of electric vehicles are some of the key factors contributing to the growth of this market. North America dominates the global solid state battery market on account of earlier and rapid adoption of advanced solid state batteries across various applications and industries.
