United States Energy Report

Description: HIGHLIGHTS IN THE UNITED STATES

In view of optimistic supply forecasts for unconventional gas, several companies are investing in LNG liquefaction plants or in converting their LNG regasification plants into bi-directional facilities. The USA has issued the first approval for a new nuclear power plant in 30 years, in addition to providing several nuclear power plants life extensions.

In North America, total primary energy production levels increased by 2.5% (52Mtoe, twice as much as Europe). A sharp increase in coal production resulted in a lower trade deficit for North America. After a severe drop in 2009, consumption levels rose 3.7% in the United States, the second largest energy consumer after China.

WHAT YOU WILL FIND IN THIS REPORT

Enerdata's United States energy market report is a reliable source for understanding the key issues and dynamics shaping the American energy industry. With timely, up-to-date energy industry data and demand forecasts, this report will help you identify and exploit challenges and opportunities in the American energy sector. The report details the sub-sectors of the energy industry (Crude Oil, refined oil products, Natural Gas, Coal, Electricity and Renewable) in the United States.

In this report you will find:

- Multi-energy approach: oil, oil products, gas & LNG, power, coal, renewable
- Recent energy and climate change policy development, and an assessment of its impact
- Key companies active in the American energy industry, along the value chain of each sub-segment
- Up-to-date insight on market structures, regulatory developments, and asset developments
- Supply & demand overview and trends, with a detailed breakdown by energy and by sector
- Historical data and trends relating to production, consumption, imports, exports and reserves for each industry sub-segment
- Projects under development in the country, including power plants, refineries, LNG terminals, gas pipelines
- Analysis of the likely evolution of the market and key industry drivers

MAIN REASONS TO BUY THIS REPORT

- Obtain up-to-date, insightful and standardised information by country
- Assess how national regulations impact the American energy industry
- Identify growth segments and opportunities in the industry
- Get a view of the entire value chain, for each type of energy
- Have a logical framework to monitor market developments and emerging trends

Contents:

1. General Overview – Country snapshot with key data
2. Institutions and Energy Policy - Key regulatory bodies, major energy and climate change policies, including energy efficiency and CO2 emissions
3. Energy Companies - Key players in each energy market, activities description and assets development
4. Energy Supply - Country's energy resources, domestic production, imports and/or exports by energy sub-segment
5. EnergyPrices & Taxes – Evolution of end-user prices and taxes levels for each energy
6. Consumption – Detailed overview of the energy demand by sector, and its evolution
7. Issues and Prospects – Key factors that will impact the market structure and dynamics in the years to come, detailed by energy

TABLES
Tables of Economic Indicators: Annual historical data including population, GNP growth, imports & exports,
inflation rate, energy security and efficiency indicators, CO2 emissions.
Tables of Supply Indicators: Historical data including oil & gas reserves, electric & refining capacity, energy production, power production and external trade. All detailed by energy source.
Tables of Demand Indicators: Historical data includes consumption per inhabitant, consumption trends, total consumption by energy source, final consumption by energy source & sector, and, electricity consumption by sector.
Tables of Energy Balances: Unique tabular display of the overall energy industry balance per annum, also graphically displayed by energy sub-segment.
Tables of Infrastructure Projects: Covers power plant projects by energy, technology, status and operator, Gas plant projects by status and operator and LNG contracts.

GRAPHS
Graph 1: CO2-energy Emissions (MtCO2)
Graph 2: Installed Electric Capacity by Source (2011, %)
Graph 3: Gross Power Production by Source (TWh)
Graph 4: Power Generation by Source (2011, %)
Graph 5: Gasoline and Diesel Prices (US$/l)
Graph 6: Electricity Prices for Industry and Households (USc/kWh)
Graph 7: Gas Prices for Industry and Households (USc/kWh GCV)
Graph 8: Consumption Trends by Energy Source (Mtoe)
Graph 9: Total Consumption Market Share by energy (2011, %)
Graph 10: Final Consumption Market Share by Sector (2011, %)
Graph 11: Oil Consumption (Mt)
Graph 12: Oil Consumption Breakdown by Sector (2011, %)
Graph 13: Electricity Consumption (TWh)
Graph 14: Electricity Consumption Breakdown by Sector (2010, %)
Graph 15: Natural Gas Consumption (bcm)
Graph 16: Gas Consumption Breakdown by Sector (2011 %)
Graph 17: Coal Consumption (Mt)
