**Worldwide Small- and Medium-sized FPD Panel Forecast, 2007 - 2011**

**Description:** In 2006 the worldwide small and medium-sized FPD (Flat Panel Display) panel industry saw 11.9% year-on-year growth in shipment volume, but a 3.1% decline in shipment value, reflecting the intense price competition in 2006 due to problems with overcapacity. a-Si TFT-LCD has become the mainstream technology for small and medium-sized FPD panel, and the replacement of CSTN-LCD and MSTN-LCD by a-Si TFT-LCD will speed up over the next few years. Mobile phones are still the most important application for small and medium-sized FPD panel, accounting for over 47% of all small and medium-sized FPD panel shipments worldwide; this is also the market segment where competition is most intense. This report will provide an in-depth analysis of these trends, and give a detailed forecast for the overall small- and medium-sized TFT-LCD panel industry.
