Offset Guidelines Quarterly Bulletin

Description:
A unique compendium of countertrade and offset guidelines for each country that publishes them, and many of those that do not.

QB comprehensively covers up-to-date offset and countertrade guidelines or practices of 75 countries (more than 300 pages), with up-dates every quarter.

No more searching - we provide key facts - even if they are not officially published by the countries concerned, with an indication whenever possible of how adaptable the offset authority tends to be in practice.

The importance of this publication is not just the breadth of information, but the presentation in clear language of essential details that are often lost in the versions put out by various offset authorities.

Multipliers - liquidated damages for non-fulfilment - thresholds - percentages - quotas - and much more.....

Business professionals need up-to-date guidelines readily available - in front of their eyes - in hard copy or electronic format - easy to find - in alphabetical order - country by country.

Maintained with quarterly updates - so you always have the latest information at your fingertips.

The importance of this publication is not just the breadth of information, but the presentation in clear language of essential details that are often lost in the versions put out by various offset authorities.

There is no other publication that monitors as we do the policy changes of every country's offset or countertrade guidelines, right down to the smallest detail.

Of countries that publish guidelines - and of countries that don't

Of countries that publish only in their own language - and of countries that divert from the guidelines or implement changes that they do not want published.

We cover them all - in plain English.

The Offset Guidelines Quarterly Bulletin is a unique and indispensable publication.

QB is published electronically 4 times per year and provides you with the key facts for every country that has a published policy as well as those that don't.

The popular perception that there are more than 130 countries with countertrade or offset policies is wide of the mark. In reality about 75 countries do so. We cover them all - all of the time. Currently QB comprises more than 300 pages of detail.
