Review of the Russian Continuous Flow Transport Equipment Market (Elevators and Conveyors)

Description: According to the market players, competition in the continuous flow transport equipment market is extremely severe. If compared to 2006, the year 2007 saw a market growth of 26%. Therefore the level of competition is much higher. The manufacturers are doing their best to be closer to their customers, and the customers prefer to buy necessary equipment nearby in order to avoid high delivery costs.

Recently there's been some growth in the segment of continuous flow transport equipment which helps to handle goods at warehouses and is also used in the food industry. There's also been a growing demand for equipment assembled in Russia from foreign-made components. It is expected that by the year 2010 the demand for continuous flow transport equipment will increase 2 or 3 times.
