ScientiaVision Product Pinpoint: The New Vaccines provides a comprehensive analysis of the worldwide market by region, as well as by vaccine category. Sales data are provided for each category and each region for 2005 through 2013. Competitor market shares are provided for the worldwide market, as well as by product category, for each year 2005 through 2008. Regional immunization rates for various vaccines are also presented in the report. All figures are presented in both U.S. dollars and Euros.

The worldwide market for vaccines has more than doubled in three years, from US$11.6 billion (€9.4 billion) in 2005 to US$25.2 billion (€16.5 billion) in 2008, having grown at a compound annual rate of 31.8% (27.6% for Euros). The market has primarily been driven by the billion-dollar products Prevnar; Gardasil; Merck's ProQuad/M-M-R II/Varivax line; Infanrix and Pediarixx; GlaxoSmithKline's hepatitis line; Sanofi Pasteur's line of polio/whooping cough/Hib vaccines; and Sanofi Pasteur's line of influenza vaccines. For the forecast period, SV projects that sales will more than double again to US$50.7 billion (€34.7 billion) in 2013, reflecting compound annual growth of 21.7% (19.2% for Euros).

Growth will be driven by the introduction of improved, high-value vaccines, such as those for pneumococcus and meningococcus; continued growth in HPV vaccines as more countries put them on national immunization lists; growth in sales of influenza vaccines for seasonal use and pandemic preparedness; growth in sales of hepatitis vaccines; introduction of improved travel and endemic vaccines; increased immunization rates in developing countries; increased immunization rates in Japan; and the introduction of expensive autologous cancer vaccines. The New Vaccines provides sales, market shares, trends, strategies, opportunities, pitfalls, and analyses of key competitors to help you profit in the vaccines market.
