Methodological Issues in Accounting Research: Theories and Methods

Description:
A major problem confronting a researcher new to this area is which theoretical perspective is most apt. A research study can be a voyage of discovering or choice of theoretical perspective as well as gathering empirics or facts on a problem or situation. This book provides a good guideline as to why and how to choose a particular theory or method to study an organisational phenomenon such as accounting.

The contributors to this collection are world-renowned in their respective field. Each chapter documents latest research in accounting and control systems.

The book is primarily intended for research students and academic researchers in the areas of accounting and organisational practices in organisations. It can also be used for undergraduate (3rd year level) and postgraduate accounting methodology courses, and research organizations/consulting firms in the accounting and business field.

Contents:
1. Introduction - Zahirul Hoque

PART I: POSITIVISTIC PERSPECTIVES
2. Rational Choice Theory - Jodie Moll and Zahirul Hoque
3. The Human Relations Theory - Zahirul Hoque
4. Theorising and Testing Fit in Contingency Research on Management Control Systems - Robert Chenhall and Christopher Chapman

PART II: NATURALISTIC RESEARCH APPROACH
