
Description: US Energy Policy under Obamas Presidency - A Move Away from Fossil Energy

Summary

The report analyzes the energy policies of the new US government under the leadership of President Obama. It covers all the key policies of the new administration across different sectors - oil & gas, nuclear, renewable energy, clean technology and energy efficiency. It also analyzes the implications of the different policies on the respective industries and on the companies operating in the industries.

Scope

- What has been the demand supply gap for primary energy in the US?
- How declining oil and gas reserves globally has impacted the business and residential sectors in the US?
- What policy changes are being considered by the US government to provide energy security to the nation?
- To what extent are renewable energy sources going to meet the surging energy demand in the US?
- What are the prospects and challenges for the US renewable energy sector?
- Which are the major companies in the US renewable energy sector and what are their competitive strategies?

Reasons to buy

- Navigate the renewable energy landscape in the US through detailed analysis of the current market dynamics and potential changes.
- Identify the most promising sector in the unconventional and renewable energy sectors in the US.
- Gain the most up to date and in-depth information on the US renewable energy market.
- Invest in key growth technologies and opportunities within the US renewable energy industry making use of our in-depth analysis.
- Identify technologies of tomorrow and be a pioneer in this nascent industry.
