Pancreatic Cancer Drug Pipeline Update

Description:
There are today 385 companies plus partners developing 444 drugs targeting pancreatic cancer in development. In addition, there is 1 suspended drug and the accumulated number of ceased drugs over the last years amount to another 136 drugs. Pancreatic Cancer Drug Pipeline Update lists all drugs and gives you a progress analysis on each one of them. Identified drugs are linked to 352 different targets. All included targets have been cross-referenced for the presence of mutations associated with human cancer. To date 340 out of the 343 studied drug targets so far have been recorded with somatic mutations. The software application lets you narrow in on these mutations and links out to the mutational analysis for each of the drug targets for detailed information. All drugs targets are further categorized on in the software application by 74 classifications of molecular function and with pathway referrals to BioCarta, KEGG, NCI-Nature and NetPath.

Drug Pipeline Update at a Glance

Investigators
Includes more than 385 principal companies plus their collaborators. There is direct access from inside the application to web pages of all principal companies.

Note: You are able to sort and find drugs according to companies and partners from drop-down menus in the application. You may also sort and find drugs according to country of companies.

Drug name & Synonyms
Lists commercial, generic and code names for drugs.

Developmental stage
This Drug Pipeline Update contains 444 drugs in development for the treatment of pancreatic cancer. In addition there are suspended and ceased drugs.

Pipeline Breakdown According to Number of Drugs
Marketed# 15
Registered# 1
Pre-registration# 1
Phase III# 24
Phase II# 152
Phase I# 114
Preclinical# 127
No Data# 10
Suspended# 1
Ceased# 136

Note: You are able to sort and find drugs according to developmental stage from drop-down menu in the application.

Indications
Included pancreatic cancer drugs are also in development for 314 other indications, where of 204 are different cancer indications.

Note: You are able to find and sort drugs according to type of indication from drop-down menu in the application.

Targets
Mutations
All targets are cross-referenced with the Catalogue of Somatic Mutations in Cancer (COSMIC). It is designed to store and display somatic mutation information and related details and contains information relating to human cancers. To date 340 out of the 343 studied drug targets so far have been recorded with somatic mutations and the software application lets you narrow in on these mutations and links out to the mutational analysis for each of the drug targets for detailed information.
Biological Structures
The identity of available biological structures on 253 drug targets was retrieved from the RCSB Protein Databank for you to easily review the 5093 structures available today among drug targets.

Identified drugs are linked to more than 352 different targets, divided into 74 classifications of molecular function:
- Aminopeptidase activity
- ATPase activity
- Auxiliary transport protein activity
- Calcium ion binding
- Carboxy-lyase activity
- Carboxypeptidase activity
- Catalytic activity
- Cell adhesion molecule activity
- Chaperone activity
- Chemokine activity
- Chromatin binding
- Cofactor binding
- Cysteine-type peptidase activity
- Cytokine activity
- Cytoskeletal protein binding
- Deaminase activity
- Defense/immunity protein activity
- DNA binding
- DNA repair protein
- DNA topoisomerase activity
- DNA-directed DNA polymerase activity
- DNA-methyltransferase activity
- Extracellular ligand-gated ion channel activity
- Extracellular matrix structural constituent
- G-protein coupled receptor activity
- Growth factor activity
- GTPase activity
- Guanylate cyclase activity
- Heat shock protein activity
- Hormone activity
- Hydrolase activity
- Ion channel activity
- Isomerase activity
- Kinase activity
- Kinase binding
- Kinase regulator activity
- Ligand-dependent nuclear receptor activity
- Ligase activity
- Lipase activity
- Lipid kinase activity
- Lipid phosphatase activity
- Metallopeptidase activity
- MHC class I receptor activity
- Molecular function unknown
- Motor activity
- Oxidoreductase activity
- Peptidase activity
- Peptide hormone
- Peroxidase activity
- Protein binding
- Protein serine/threonine kinase activity
- Protein threonine/tyrosine kinase activity
- Protein tyrosine phosphatase activity
- Protein-tyrosine kinase activity
- Receptor activity
- Receptor binding
- Receptor signaling complex scaffold activity
- Receptor signaling protein serine/threonine kinase activity
- RNA binding
- RNA-directed DNA polymerase activity
- Serine-type peptidase activity
- Structural constituent of cytoskeleton
- Structural molecule activity
- T cell receptor activity
- T cell receptor binding
- Transcription factor activity
- Transcription regulator activity
- Transferase activity
- Translation regulator activity
- Transmembrane receptor activity
- Transmembrane receptor protein tyrosine kinase activity
- Transporter activity
- Unclassified
- Voltage-gated ion channel activity

Sub-Cellular Localization
Identified targets are categorized into 37 different primary and alternate sub-cellular localizations:
- Apical membrane
- Basolateral membrane
- Cell junction
- Cell surface
- Centrosome
- Chromosome
- Clathrin-coated vesicle
- Cytoplasm
- Cytoplasmic vesicle
- Cytoskeleton
- Cytosol
- Endoplasmic reticulum
- Endosome
- Extracellular
- Extracellular matrix
- Focal adhesion
- Golgi apparatus
- Golgi membrane
- Integral to membrane
- Intermediate filament
- Kinetochoore
- Lysosome
- Membrane fraction
- Microtubule
- Mitochondrion
- Nuclear membrane
- Nucleolus
- Nucleoplasm
- Nucleus
- Perinuclear region
- Perinuclear vesicle
- Plasma membrane
- Sarcoplasmic reticulum
- Secreted
- Secretory granule
- Secretory vesicle
- Zymogen granule

Note: You are able to find and sort drugs according to target gene name, protein name, molecular function of target, target localization, presence of mutations and availability of biological structures of target from drop-down menus in the application.
Target Expression Profile
Direct links are provided from inside the application to 521 protein expression profiles of 323 drug targets in various human tissues and cancer types, cell lines and primary cells, including up to:
- 48 different normal tissue types
- 20 different types of cancer
- 47 cell lines
- 12 samples of primary blood cells

Pathway Referals
Identified targets have been cross referenced against their involvement in different cellular pathways, according to BioCarta, KEGG, NCI-Nature and NetPath.
- BioCarta# 247 Pathways
- KEGG# 205 Pathways
- NCI-Nature# 253 Pathways
- NetPath# 32 Pathways

Note: You are able to find and sort drugs according to targeted pathways from drop-down menus in the application.

Mechanism
In total there are different drug mechanism of action represented in this Drug Pipeline Update.

Note: You are able to find and sort drugs according to mechanism of action from drop-down menu in the application.

Compound
Identified drug compounds are described by:

Compound type, Chemical name, CAS Number and molecular weight

Note: You are able to sort and find drugs according to compound type from drop-down menu in the application.

Drug Profile
Progress analysis and review of drug development. A typical drug profile reports on, depending on stage of development and available information:

Drug Name & Synonyms
Presentation of drug name and synonyms

Principal Company & Partners
Presentation of principal company and partners

Target and Molecular Function of Target
Described target(s) is/are presented with:
Official Gene Symbol – Chromosome Location – Gene & Protein Name – Molecular Function

Target Localization
Described target(s) is/are presented with primary and alternate localizations.

Target Expression Profiles
Links to protein expression profile(s) of target(s) in various human tissues, cell lines and primary cells, including up to:
- 48 different normal tissue types
- 20 different types of cancer
- 47 cell lines
- 12 samples of primary blood cells

Mutation
All targets are cross-referenced with the Catalogue of Somatic Mutations in Cancer (COSMIC). It is designed to store and display somatic mutation information and related details and contains information relating to human cancers.

Biological Structures
The identity of available biological structures on drug targets was retrieved from the RCSB Protein Databank for you to easily review what available structures of drug targets exist.

Targeted Pathways
Described target(s) is/are matched for the involvement in cellular pathways according to BioCarta, KEGG, NCI-Nature and NetPath.

Mechanism
Drug mechanism of action

Developmental Projects
Summary field of developmental projects for the drug, including indication, developmental stage and status.
Example:
Cancer, myeloma – Phase II Clinical Trial – Active
Cancer, prostate – Phase III Clinical Trial – Ceased

Drug BioSeeker Group's software
Short introduction to drug

Compound Data
Compound type, Chemical name, CAS Number and molecular weight

Patent Data
Available patent information related to the drug is presented here.

Fillings and Approvals
Approvals and submissions
Analyst comments

Deals & Licensing
Collaborations and deals
Availability for licensing

Phase IV Data
Available Phase IV development data, developmental history and scientific data.

Phase III Data
Available Phase III development data, developmental history and scientific data.

Phase II Data
Available Phase II development data, developmental history and scientific data.

Phase I Data
Available Phase I development data, developmental history and scientific data.

Phase 0 Data
Available Phase 0 development data, developmental history and scientific data.

Preclinical Data
Available preclinical development data, developmental history and scientific data.

Discovery Data
Available discovery development data, developmental history and scientific data.

Application Features
Search, Find and Filter Panel with Initial Result Presentation
With this panel you can define your selectivity in each drug search with up to 24 different drug specific parameters. Each parameter has multi-select options to them and can be used as either an inclusion parameter or exclusion parameter.

The initial result table is a dynamic sortable table which gives you a fast overview of found results and can be narrowed down further by your own additional keywords.
Direct linkage from inside the application to related internet resources
- Drug data is linked to search engines like Google and PubMed
- Drug target data is linked directly to BioCarta, Human Protein Atlas, KEGG, NCI-Nature, NetPath etc.
- Direct links to company web pages of companies

Dynamic Report Generator
The dynamic report generator lets you with ease and speed generate html reports directly in your web browser (Internet Explorer and FireFox), whether it is a single drug profile or an entire search you want have a report of.

System Requirements
- Operating system: Windows (2000/XP/Vista/7/8) for Mac Users the service is only available online
- Browser Application (Internet Explorer, Firefox, Chrome, Safari)
- Internet access (to access related internet resources)

Ordering:
Order Online - http://www.researchandmarkets.com/reports/1196704/
Order by Fax - using the form below
Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct and select the format(s) you require.

- **Product Name:** Pancreatic Cancer Drug Pipeline Update
- **Web Address:** http://www.researchandmarkets.com/reports/1196704/
- **Office Code:** SC

Product Formats
Please select the product formats and quantity you require:

- **Electronic (Online Access) - Single User:** □ USD 2250
- **Electronic (Online Access) - Site License:** □ USD 4500
- **Electronic (PDF) - Enterprisewide:** □ USD 6750

* The price quoted above is only valid for 30 days. Please submit your order within that time frame to avail of this price as all prices are subject to change.

Contact Information
Please enter all the information below in **BLOCK CAPITALS**

- **Title:**  
  - Mr □  
  - Mrs □  
  - Dr □  
  - Miss □  
  - Ms □  
  - Prof □  
- **First Name:** ________________________________  
- **Last Name:** ________________________________
- **Email Address:** * ____________________________________________
- **Job Title:** ________________________________________________
- **Organisation:** _____________________________________________
- **Address:** ________________________________________________
- **City:** ____________________________________________________
- **Postal / Zip Code:** _______________________________________
- **Country:** ________________________________________________
- **Phone Number:** __________________________________________
- **Fax Number:** ____________________________________________

* Please refrain from using free email accounts when ordering (e.g. Yahoo, Hotmail, AOL)
Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by Wire Transfer: Bank details will be provided on the invoice which you will receive after you place your order with us.

If you have a Marketing Code please enter it below:

Marketing Code: ____________________________

Please note that by ordering from Research and Markets you are agreeing to our Terms and Conditions at http://www.researchandmarkets.com/info/terms.asp
