Clinical Management Issues

Description: Clinical Management Issues is a peer-reviewed online journal, which mainly publishes original case reports, covering all therapeutic areas of medicine.

The aim of the published case reports is to expand medical knowledge, allowing a better explanation of the practical application of a clinical guideline, or including an up-to-date review of medical knowledge in that field, or helping doctors to make better decisions in a “grey area”, or explaining how to manage a disease with an integrated approach between different specialists involved.

CMI also publishes unusual case reports (i.e. unusual side effects or adverse interactions involving medications, unexpected or unusual presentations of a disease, etc.), original research and drug profiles.

All the case reports are published in an online database and are available as part of the subscription.

Readership: General practitioners and specialists
