Bluetooth Application Developer's Guide

Description:

"Bluetooth (enabled devices) will ship in the billions of units once it gains momentum." - Martin Reynolds, Gartner Group

Bluetooth is the most exciting development in wireless computing this decade! Bluetooth enabled devices can include everything from network servers, laptop computers and PDAs, to stereos and home security systems. Most Bluetooth products to hit the market in 2001 will be PC cards for laptop computers and access points, which allow up to seven Bluetooth devices to connect to a network. Reports indicate that by the end of 2003 there will be over 2 billion Bluetooth-enabled devices.

Bluetooth-enabled devices communicate with each other through embedded software applications. Bluetooth Developer's Guide to Embedded Applications will provide embedded applications developers with advanced tutorials and code listings written to the latest Bluetooth's latest specification, version 1.1. Written by Bluetooth pioneers from market leaders in Bluetooth software development, Extended Systems and Cambridge Silicon Radio, this is the first advanced level Bluetooth developer title on the market.

- White Hot Topic- While other books introduce readers to the possibilities of Bluetooth, this is the first comprehensive, advanced level programming book written specifically for embedded application developers
- Authors are responsible for SDK, the market-leading development tool for Bluetooth- Comes with Syngress' revolutionary Credit Card CD containing a printable HTML version of the book, all of the source code and sample applications from Extended Systems and Cambridge Silicon Radio

Contents:

Foreword

Chapter 1 Introducing Bluetooth Applications
  Introduction
  Why Throw Away Wires?
    Adding Usability to Products
    Allowing for Interference
    Considering Connection Times
    Coping with Limited Bandwidth
    Considering Power and Range
    Deciding on Acceptable Range
    Recognizing Candidate Bluetooth Products

Considering Product Design
  Are You Adding End User Value?
  Do You Have Time?

Investigating Product Performance
  Evaluating Connection Times
  Quality of Service in Connections
Delivering Voice Communications
Investigating Interference
Assessing Required Features
Enabling Security
Using Low Power Modes
Providing Channel Quality Driven Data Rate
Deciding How to Implement
Choosing a System Software Architecture
Choosing a Hardware Implementation Option
Design Bluetooth Directly Onto the PCB
Using a Prequalified Complete Bluetooth Module
Considering Battery Limitations
Summary
Solutions Fast Track
Frequently Asked Questions
Chapter 2 Exploring the Foundations of Bluetooth
Introduction
Reviewing the Protocol Stack
L2CAP
RFCOMM
OBEX
PPP
TCS Binary
SDP
Management Entities
HCI
Lower Layers
Why Unconnected Devices Need to Talk
Discovering Neighboring Devices
Inquiring and Inquiry Scanning
Timing
When to Stop
Connecting to a Device
Paging and Page Scanning
Timing
Who Calls Who?
Finding Information on Services a Device Offers
Connecting to and Using Bluetooth Services
Summary
Solutions Fast Track
Frequently Asked Questions

Chapter 3 Power Management
Introduction
Using Power Management: When and Why Is It Necessary?
Investigating Bluetooth Power Modes
Active Mode
Hold Mode
Sniff Mode
Park Mode
Evaluating Consumption Levels
Summary
Solutions Fast Track
Frequently Asked Questions

Chapter 4 Security Management
Introduction
Deciding When to Secure
Outfitting Your Security Toolbox
Authentication
Authorization: How and Why?
Enabling Encryption
Understanding Security Architecture
The Role of the Security Manager
Mode 1 Role
Mode 2 Role
Mode 3 Role
Mode Unknown

The Role of Security Databases
Role of Device Databases

Working with Protocols and Security Interfaces
Mode 2 Operation
Mode 3 Operation

Exploring Other Routes to Extra Security
Invisibility
Application Level Security
Implementing Security Profiles
Case Study

Summary
Solutions Fast Track
Frequently Asked Questions

Chapter 5 Service Discovery

Introduction
Introduction to Service Discovery
Service Discovery Protocols

Architecture of Bluetooth Service Discovery
The Structure of Service Records
The Service Discovery Protocol

Discovering Services
Short-Circuiting the Service Discovery Process
Creating and Advertising a Service
Discovering Specific Services
Browsing for Services

Service Discovery Application Profile
Service Discovery Non-Application Profiles

Java, C, and SDP
Other Service Discovery Protocols

Salutation

Service Location Protocol

Jini

Universal Plug and Play (UPnP)

The Future of SDP

Summary

Solutions Fast Track

Frequently Asked Questions

Chapter 6 Linux Bluetooth Development

Introduction

Assessing Linux Bluetooth Protocol Stacks

Comparing BlueDrekar with OpenBT by Features

Other Considerations

Understanding the Linux Bluetooth Driver

Learning about the Kernel Driver

Understanding the Bluetooth Driver Interface

Using Open Source Development Applications

Investigating the OpenBT Applications

Establishing a PPP Connection Using the btd Application

Writing Your Own Minimal Application

Connecting to a Bluetooth Device

Initializing the Bluetooth Stack

Finding Neighboring Devices

Using Service Discovery

Connecting to a Bluetooth Service

Transferring Data

Disconnecting

Controlling a Bluetooth Device

Distinguishing between Control and Data Applications

Using ioctlS to Control the Device

Covering Basic Scenarios
Chapter 7 Embedding Bluetooth Applications

Introduction

Understanding Embedded Systems
  Understanding Tasks, Timers, and Schedulers
  Understanding Messaging and Queues
  Using Interrupts

Getting Started
  Installing the Tool Set
  Building a Sample Application

Running an Application under the Debugger
  Using Plug-Ins
  Debugging under BlueLab

Running an Application on BlueCore
  Debugging Using VM Spy

Using VM Packets
  Packing Format in Messages

Using the BlueLab Libraries
  Basic Libraries
  CSR Library
  Application Libraries
  Using Tasks and Messages
  Connection Manager

Deploying Applications

Summary

Chapter 8 Using the Palm OS for Bluetooth Applications

Introduction
What You Need to Get Started

Understanding Palm OS Profiles

Choosing Services through the Service Discovery Protocol

Updating Palm OS Applications Using the Bluetooth Virtual Serial Driver

Creating a VDRV Client-Only Application

Using Bluetooth Technology with Exchange Manager

Creating Bluetooth-Aware Palm OS Applications

Using Basic ACL Links

Creating L2CAP and RFCOMM Connections

Using the Service Discovery Protocol

Using Bluetooth Security on Palm OS

Writing Persistent Bluetooth Services for Palm OS

The Future of Palm OS Bluetooth Support

Summary

Solutions Fast Track

Frequently Asked Questions

Chapter 9 Designing an Audio Application

Introduction

Choosing a Codec

Pulse Code Modulation

Continuous Variable Slope Delta Modulation

Configuring Voice Links

Choosing an HV Packet Type

Sending Data and Voice Simultaneously

Using ACL Links for High-Quality Audio

Choosing an Audio Interface

Selecting an Audio Profile

Applications Not Covered by Profiles

New Audio Profiles

Writing Audio Applications

Discovering Devices

Using Service Discovery
Ordering:

Order Online - http://www.researchandmarkets.com/reports/1757675/

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

Product Name: Bluetooth Application Developer’s Guide
Web Address: http://www.researchandmarkets.com/reports/1757675/
Office Code: SC

Product Format
Please select the product format and quantity you require:

| Quantity | Hard Copy (Paper back): USD 51 + USD 30 Shipping/Handling |

* Shipping/Handling is only charged once per order.
* The price quoted above is only valid for 30 days. Please submit your order within that time frame to avail of this price as all prices are subject to change.

Contact Information
Please enter all the information below in BLOCK CAPITALS

Phone Number: ___________________________
Fax Number: ___________________________

* Please refrain from using free email accounts when ordering (e.g. Yahoo, Hotmail, AOL)
Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by Wire Transfer: Bank details will be provided on the invoice which you will receive after you place your order with us.

If you have a Marketing Code please enter it below:
