Bluetooth Application Programming with the Java APIs. The Morgan Kaufmann Series in Networking

Description: Adoption of Bluetooth wireless technology has made great strides in the last few years. One of the biggest steps forward—the standardization of Java APIs for Bluetooth wireless technology (JABWT)—is explained in detail in this book. The JABWT standard, defined by the JSR-82 specification, supports rapid development of Bluetooth applications that are portable, secure, and highly usable. Wireless device manufacturers have responded to the JABWT specification by announcing mobile phones and other products that will run JABWT applications. Bluetooth Application Programming with the Java APIs explains in detail how to write Bluetooth applications using the Java APIs to exploit the power of both technologies. Written by the specification lead for JSR-82 and two other key participants in the definition of JABWT, this book provides the authoritative explanations and concrete examples you need to get started right away.

About the Authors

C Bala Kumar is a Distinguished Member of the Technical Staff at Motorola. He chaired the industry expert group that defined the Java APIs for Bluetooth wireless technology. He currently leads the systems software team for wireless platforms in Motorola's Semiconductor Products Sector. Paul J. Kline is a Distinguished Member of the Technical Staff at Motorola and the maintenance lead for the JABWT specification. He currently works on the System Software Architecture team in Motorola's Semiconductor Products Sector. Timothy J. Thompson is a Senior Software Engineer on the System Software Architecture team in Motorola's Semiconductor Products Sector. He was the OBEX architect on the JABWT specification team at Motorola.

- Written by experts—the authors led the industry team that defined the JABWT standard and the Motorola team that developed the first JABWT implementation—Covers JABWT in depth and goes beyond the specification to explain how to use the standard effectively—A helpful resource both to Java programmers interested in Bluetooth wireless technology and to business managers interested in its potential for creating new business opportunities—Digs deeply into the programming areas you must master to successfully design and build JABWT applications, including RFCOMM, OBEX, device discovery, service discovery, and L2CAP—Details the real-world issues involved in programming Bluetooth devices and implementing the JABWT specification—Organized into sections that explicitly address the different needs of programmers, business managers, and project managers

Contents:

Chapter 1 Introduction
1.1 Wireless Connectivity
1.2 What is Bluetooth Wireless Technology?
1.3 Overview of the Bluetooth Stack architecture
1.4 What is J2ME?
1.5 Why Java Technology for Bluetooth Devices?
1.6 Summary

Chapter 2 An Overview of JABWT
2.1 Goals
2.2 API Characteristics and Hardware Requirements
2.3 Scope
2.4 Summary

Chapter 3 High-Level Architecture
3.1 Architecture of JABWT
3.2 Bluetooth Control Center
3.3 Simple JABWT Application
3.4 Summary

Chapter 4 RFCOMM
4.1 Overview
4.2 API capabilities
4.3 Programming with the API
4.4 Summary

Chapter 5 OBEX
5.1 Overview
5.2 API Capabilities
5.3 Programming with the API
5.4 Summary

Chapter 6 Device Discovery
6.1 Overview
6.2 API capabilities
6.3 Programming with the API
6.4 Summary

Chapter 7 Service Discovery
7.1 Overview
7.2 API capabilities
7.3 Programming with the API
7.4 Summary

Chapter 8 L2CAP
8.1 Overview
8.2 API Capabilities
8.3 Programming with the API
8.4 Summary

Chapter 9 Example Applications
9.1 Overview
9.2 Tic-Tac-Toe MIDlet
9.3 OBEX Application Download
9.4 Summary

Chapter 10 Implementing JABWT on a Device
10.1 Porting Process
10.2 Steps 1 and 2: Adding J2ME and Bluetooth support
10.3 Step 3: Implementing JABWT
10.4 Step 4: TCK Compliance

Chapter 11 Closing Remarks

Appendix A: Complete Code Examples
Appendix B: javax.bluetooth.api
Appendix C: java.obex.api

Ordering:

Order Online - [http://www.researchandmarkets.com/reports/1757676/](http://www.researchandmarkets.com/reports/1757676/)

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit

http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

Payment Information
Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by Wire Transfer: Bank details will be provided on the invoice which you will receive after you place your order with us.
