Energy Insight: A Daily Fundamental Report on Crude Oil, Natural Gas and Gasoline

Description: The commodities market, contrary to what many people think, has been in existence in India through the ages. However, the recent attempt by the Government to permit multi-commodity national level exchanges has given it a shot in the arm. As a result, two exchanges - Multi Commodity Exchange (MCX) and National Commodity and Derivatives Exchange (NCDEX) - have come into being. These exchanges, by virtue of their high profile promoters and stakeholders, bundle online trading facilities, robust surveillance measures and a hassle-free settlement system. The future contracts available on a wide spectrum of commodities like Gold, Silver, Cotton, Steel, Soya oil, Soya beans, Wheat, Sugar, Chana etc., provide excellent opportunities for hedging the risks of farmers, importers, exporters, traders and large scale consumers. They also open an avenue for quality investments in precious metals. The commodities market, as it is not affected by the movements of the stock market or debt market, provides tremendous opportunities for better diversification of risk. Realizing this fact, even mutual funds are contemplating entering into this market.

“Energy Insight: A Daily Fundamental Report on Crude Oil, Natural Gas and Gasoline” contains a fundamental review of the previous day's price movement and includes an outlook for the day on both crude oil and natural gas.

This report gives an idea how commodity prices may fluctuate throughout the day by tracking both economical and fundamental factors. Intraday technical calls are available in this report. The report also includes major economic releases for the day and their impact on price movements. The report also throws light on spreads (inter commodity, intra commodity) and ratios (Crude & Natural Gas).
