Global Antibody Partnering Terms and Agreements 2010-2017: Deal trends, players and financials

Description: The Global Antibody Partnering Terms and Agreements 2010 to 2017 report provides comprehensive understanding and unprecedented access to the Antibody partnering deals and agreements entered into by the world's leading healthcare companies.

The report provides a detailed understanding and analysis of how and why companies enter Antibody partnering deals. The majority of deals are discovery or development stage whereby the licensee obtains a right or an option right to license the licensors Antibody technology. These deals tend to be multicomponent, starting with collaborative R&D, and commercialization of outcomes.

This report provides details of the latest antibody agreements announced in the healthcare sectors, covering:

- Antibodies
- Antibody-drug conjugates
- Monoclonal antibodies
- Murine mAb
- Chimeric mAb
- Humanized mAb
- Human aAb
- Polyclonal Antibodies

Understanding the flexibility of a prospective partner's negotiated deals terms provides critical insight into the negotiation process in terms of what you can expect to achieve during the negotiation of terms. Whilst many smaller companies will be seeking details of the payments clauses, the devil is in the detail in terms of how payments are triggered - contract documents provide this insight where press releases do not.

This report contains over 1,200 links to online copies of actual Antibody deals and contract documents as submitted to the Securities Exchange Commission by companies and their partners. Contract documents provide the answers to numerous questions about a prospective partner's flexibility on a wide range of important issues, many of which will have a significant impact on each party's ability to derive value from the deal.

The initial chapters of this report provide an orientation of Antibody dealmaking and business activities. Chapter 1 provides an introduction to the report, whilst chapter 2 provides an overview of the trends in Antibody dealmaking since 2010, including details of average headline, upfront, milestone and royalty terms.

Chapter 3 provides a review of the leading Antibody deals since 2010. Deals are listed by headline value, signed by big pharma, most active Antibody dealmaking companies. Where the deal has an agreement contract published at the SEC a link provides online access to the contract.

Chapter 4 provides a comprehensive listing of the top 25 most active companies in Antibody dealmaking with a brief summary followed by a comprehensive listing of Antibody deals, as well as contract documents available in the public domain. Where available, each deal title links via Weblink to an online version of the actual contract document, providing easy access to each contract document on demand.

Chapter 5 provides a comprehensive and detailed review of Antibody partnering deals signed and announced since Jan to 2010. The chapter is organized by company A-Z, deal type (collaborative R&D, co-promotion, licensing etc), and specific therapy focus. Each deal title links via Weblink to an online version of the deal record and where available, the contract document, providing easy access to each contract document on demand.

Chapter 7 provides a comprehensive and detailed review of Antibody partnering deals signed and announced since Jan to 2010. The chapter is organized by specific Antibody technology type in focus. Each deal title links via Weblink to an online version of the deal record and where available, the contract
In addition, a comprehensive appendix is provided organized by Antibody partnering company A-Z, deal type definitions and Antibody partnering agreements example. Each deal title links via Weblink to an online version of the deal record and where available, the contract document, providing easy access to each contract document on demand.

The report also includes numerous tables and figures that illustrate the trends and activities in Antibody partnering and dealmaking since 2010.

In conclusion, this report provides everything a prospective dealmaker needs to know about partnering in the research, development and commercialization of Antibody technologies and products.
